Fraternity house ravaged by fire, one member dies

by Keith Missey
News Editor

A devastating loss occurred over Valentine's Day weekend when Jared Adams, a member of Pi Kappa Alpha Fraternity (Pikes), died in a fire that partially destroyed the fraternity house.

Adams' body was discovered at approximately 1 p.m. Saturday afternoon in a hallway outside his room. Phelps County Coroner Larry Swinford said Adams had died of smoke inhalation.

Adams, 21, was a junior at the University of Missouri-Rolla, with a double major in electrical engineering and engineering physics.

In a statement given to the St. Louis Post-Dispatch on Sunday, Jerry Adams of Manchester said about his son, "He was a very, very bright student, who worked very hard at everything he wanted."

Dr. Chris Ramsay, associate professor in the Metallurgical Department and advisor to Pikes, said, "Jared was a bright, smart, funny, artistic person with a quick smile. In every sense of the word, he was a brother."

Adams' funeral will be held at 10 a.m. today at the Schrader Funeral Home, 14960 Manchester Road at Holloway in Ballwin, Mo. The Interfraternity Council and Pikes are also working on a campus memorial service for Adams.

Memorial contributions may be made to Jared Adams Memorial Fund, University Advancement, 112 Campus Support Facility, University of Missouri, Rolla, Mo.

65409-1320.

In a statement released from the chancellor's office, Chancellor John Park stated, "The entire campus community is grieving the tragic death of Jared Adams. The Rolla community

and our alumni share our grief in the loss. The campus will be providing assistance to the students from Pi Kappa Alpha both in meeting their physical needs and in providing grief counseling."

In a press conference held on Monday, Park added to his condolences. "There has been a real outpouring of support. In a small community such as this, you get to know people's names and faces. It feels like

we lost a part of our family."

"It's nothing short of remarkable on how the members are coping with the ordeal," Ramsay said. "This is one fine group of guys. They're banding together, and in every sense of the word acting as brothers."

Among Adams' survivors, in addition to his parents, Jerry and Julie Adams, are an older brother, Jay, and two younger brothers, Juddsen and Michael.

The fire started early Saturday morning. Rolla Fire and Rescue responded to a report of smoke coming through the walls inside the building at approximately 1:51 a.m.

According to a news release from the Rolla Fire and Rescue, "the initial report from the first arriving crews stated the fire was visible in the basement area. The crews were unable to suppress the fire and were forced out of the basement due to heavy fire and heat. The interior attack continued for over an hour, but the fire spread from the basement to the

upper floors." Fire crews evacuated the building at that time to avoid injury from a possible building collapse. The crews continued to fight the fire from the outside using "exterior master streams."

The fire's spread was brought under control nine hours after the initial report. Fire Chief Keith Crowell said most of the rooms suffered heat and smoke damage. The dining and boarding rooms were preserved, but one side of the fraternity house was completely demolished.

Fire crews from Rolla, Doolittle and St. James continued to put

Society of Hispanic Engineers wins national award

by Manav Misra
News Writer

The UMR chapter of the Society of Hispanic Professional Engineers (SHPE) took fifth place in a nationwide design competition sponsored by the national SHPE organization.

The competition was held in Los Angeles on February 3-6 as part of the National Technical Career Conference (NTCC). Members of the team — chairperson and UMR SHPE secretary Genevieve Fabela, Sarah Puli-

do and Fernando Marin — received \$1000 for their chapter for their fifth place finish and an additional \$500 for competing in the national Academic Olympiad.

"We were very proud to have two teams entered into two really big competitions this year," said Patricia Perez, SHPE President. "This was truly an accomplishment for our chapter."

The design was to be an original idea or an improvement to any existing product. This year, the team's

design was titled "Long Distance Call Tracker," a device which logs outgoing long distance calls, while separating calls for users among a household.

Fabela said, "It is perfect for a college student with multiple roommates who has to watch their budget."

After submitting a preliminary design, AutoCAD drawings, a production and cost analysis and a list of parts back in October, the team passed the preliminary rounds and was 1 of 10 schools selected for the

Ryan Lynch, who lived in the same suite said, "It was really nice, definitely worth the extra money."

Mayer wins paper competition

◆ For the second consecutive year, Michael Mayer, a senior in Electrical Engineering at the University of Missouri-Rolla won a student paper competition sponsored by the St. Louis Section of the Institute of Electrical and Electronic Engineers (IEEE).

The competition was held on February 5 at Washington University and included Electrical Engineering students from the University of Missouri-Rolla, Washington University, St. Louis University, and Southern Illinois University.

After winning in St. Louis, Michael Mayer's paper will be judged as part of another competition involving campuses in Missouri, Illinois, Kansas, Iowa, and South Dakota.

Mayer authored his paper, "Designing a Peripheral for the Personal Computer," as part of his Digital Signal Processing Class. He discussed the development of an application which would allow a PC to operate as an oscilloscope to measure electrical signals.

Master's degree to be offered

◆ UMR will offer a master's degree in engineering management throughout the state beginning next fall through a cooperative agreement with five other Missouri universities. The program also will be offered to communities served through the University of Missouri System's eight Telecommunication Community Resource Centers (TCRCs). The TCRCs are located in Camden, Kirksville, Mexico, Nevada, Park Hill, Poplar Bluff, Portageville and Reeds Spring.

Future plans call for offering

the UMR courses over the Internet.

"The degree program is designed for working engineers who want to further their education, so flexibility is an important component of this program," said UMR Chancellor John T. Park. "We'll use all the available technology at our disposal to meet the needs of individuals in businesses and industries all across Missouri."

The program is supported by the state Mission Enhancement program, which provides universities the means to expand their areas of excellence to better serve Missourians and the needs of society.

Engineers building 21st century bridge

◆ The bridge of the 21st century won't be made of concrete and steel, but of strong, lightweight materials equipped with electronic and optical sensors that warn engineers of any potential structural problems.

That's the vision of a group of engineering researchers at the University of Missouri-Rolla, who are building such a bridge as part of an innovative teaching and research project funded by the National Science Foundation.

"This bridge will be a demonstration project as well as a working laboratory, so that our students can see how a real, smart composite bridge works," said Dr. Steve E. Watkins, associate professor of electrical engineering at UMR and the principal investigator for the research project.

The project, titled "Advanced Materials for Civil Infrastructure: Multidisciplinary Curriculum Development," is funded through the NSF's Combined Research Curriculum Development program. The three-year project, which began in January, is supported by \$400,000 from NSF and \$149,000 from UMR. The professors and students from a variety of engineering disciplines

In A Nutshell

Campus newsbriefs and announcements

plines are building a prototype of their bridge on the UMR campus. After testing the prototype, they plan to work with the Missouri Department of Transportation and the Lemay Center for Composite Technology in St. Louis County to design three similar bridges in Wellston, Mo. The Wellston bridges will be used for automotive traffic.

The prototype structure on campus, which is expected to be completed this spring, will replace a wooden bridge located on the UMR Trace just east of the Curtis Laws Wilson Library.

The new bridge will be built of a fiber-reinforced material that is manufactured at the Lemay Center for Composite Technology in St. Louis, a not-for-profit technology-transfer business supported by the Office of Naval Research. The material consists of glass and graphite fibers in a polymer matrix, and is lighter, stronger and more durable than concrete or steel.

The bridge also will be equipped with fiber-optic sensors—the "smart" part of the structure—that will allow researchers to monitor how well the material holds up under foot traffic. According to Watkins, the sensors will be wired to UMR's fiber-optic network, giving researchers access to all manner of data about the structure from their desktop computers.

This project is about more than research, however. As part of the NSF program, Watkins and his co-investigators are designing two new interdisciplinary courses to go along with the bridge-building project. The new courses—Materials and Sensors, to be offered in the fall, and Smart Civil Structures, to be offered next winter—will be available to students in aerospace engineering, civil engineering, computer engineering, electrical engineering and

mechanical engineering. This approach makes the curriculum truly interdisciplinary, Watkins stated.

"Our plan is to really teach interdisciplinary skills and knowledge to the students in these majors," he added. "We're trying to teach them to work together with people from other disciplines, just as they'll do when they graduate and get jobs in industry."

Working with Watkins on the project are Dr. D.J. Belarbi, associate professor of civil engineering; Dr. K. Chandrashekhara, professor of mechanical and aerospace engineering and engineering mechanics; Dr. Richard Hall, associate professor of psychology; and Dr. Antonio Nanni, the Vernon and Maralee Jones Professor of civil engineering.

Chi Omega to host spaghetti dinner

◆ On Sunday, February 21, Chi Omega will host its seventh annual spaghetti dinner, with all proceeds donated to St. Jude's Research Hospital.

St. Jude's cares for children with cancer, at no charge to the family. The benefit dinner will run from 12-7 p.m., at the Chi Omega house, 1607 Pine.

The cost of each dinner is \$3.50, and includes real Italian Spaghetti, authentic garlic bread, dessert, and drinks. Tickets can be purchased in advance by stopping by Chi Omega or calling 364-8989.

Tickets will also be available the day of the dinner. Also, T-shirts will be available to order, commemorating this event.

Research symposium on April 14

◆ The Ninth Annual Undergraduate Research Symposium will be held on April 14, from 1-5 p.m.

simultaneously in the Meramec Room, Missouri Room, and Mark Twain Room of the University Center (depending on the number of entries).

This Symposium offers students a competitive campus wide forum in which to present the results of their undergraduate research projects. Judging categories will include composition (based on paper), achievement (based on project), and oral presentation (based on talk).

Eligible research projects must be completed as an undergraduate which is presented at UMR. Students participating in the 1998-99 Opportunities for Undergraduate Research Experience Program may submit their final report for this competition. UMR faculty serve as judges.

Students wishing to participate must submit an application and a research paper (refer to OURE Report Guidelines) to the Office of the Vice Chancellor for Academic Affairs, 204 Parker Hall, by March 31, 1999. Applications will be reproduced to provide program notes and the schedule for talks. Applications are available in 204 Parker Hall or may be completed on-line at <http://www.umn.edu/~acj-afrs/entryform.html>.

Overhead and slide projectors will be provided. Other equipment will be provided upon request and if available.

Cash prizes are awarded to the top four winners: First, \$1500; Second, \$950; Third, \$450, and Fourth, \$250.

Information compiled from various sources.

The Missouri Miner

The Missouri Miner is the official publication of the students of the University of Missouri - Rolla. It is distributed each Wednesday in Rolla, Missouri and features activities of the students of UMR. The Missouri Miner is also online at <http://www.umn.edu/~miner>.

The Missouri Miner encourages comments from its readers and will attempt to print all responsible letters and editorial material received. All submissions must have a name, student ID number, and phone number for verification. Names may be withheld upon request.

The Missouri Miner is operated by the students of UMR and the opinions expressed in it do not necessarily reflect those of the university, faculty, or student body.

All articles, features, photographs, and illustrations published are the property of the Missouri Miner and may not be reproduced or published without written permission.

Submissions for publication must be in our mail box in 113 University Center-West by 3:30 p.m. on the Thursday before publication. Submissions will be accepted through e-mail at miner@umn.edu. The Missouri Miner reserves the right to edit all submissions for style, grammar, punctuation, spelling, length, and matters of good taste.

StuCo proposes plan for a sports bar on campus

by Allan Annaert
News Writer

If an idea proposed by Student Council is approved, a sports bar might be seen on campus in the near future.

Karl Schmitt, StuCo President said, "What we're proposing is about 4000 square feet, the size of Centennial Hall, with a dance floor, dart boards, pool tables, and a bar." In the basement of the new University Center, when it is completed in March 2001, there will be about 9000 square feet unused.

Beer would be served during limited hours, possibly 3-7 p.m. Monday through Thursday and 3-10 p.m. on weekends. There would also probably be a limit on the number of drinks you could have. The bar would also serve other drinks and various foods, like the snack shop in the University Center now.

The proposed plan is still just an idea and has not been approved. Dr. Wendell Ogrofsky, Vice Chancellor of Student Affairs, pointed out in an e-mail that "inclusion of a pub totally depends on whether we meet budget restrictions." He also mentioned that campus officials have not yet seriously considered the idea.

Schmitt commented, "A lot of

people, including faculty and students, support this idea."

StuCo also wants this area to be nicer than the current game center in the University Center. According to Schmitt, "It will be finished somewhat like Applebee's."

Mike Carlson, a senior who used to bartend at The Grotto, said, "It would make the campus more attractive. Something like this would probably attract students to Rolla."

Dave Dorn, a fifth year senior, pointed out that this "would hopefully be a nice social hangout, instead of just a basement." However, Dorn did add, "Parents might not like the idea of the campus serving beer to its students."

Schmitt said, "there will be limits on how much a person could drink." In theory, this would make the bar more of a social establishment, not just a place to drink."

Donald Green, General Manager of Marriott Services, said, "Marriott already has a Liquor License for the University Center. If campus decides to have this, we will put in a bid for it."

The plans are all still in the initial stages. Dr. Ogrofsky stated, "We haven't had anything more than a surface level discussion about these ideas."

UMR graduate student wins research competition

by Tracia West
News Writer

Recently, Brian Miller, a graduate student in Civil Engineering at UMR, won a research competition sponsored by the Missouri Chapter of the American Concrete Institute (ACI).

The competition was held on February 9 at the University of Missouri-Columbia, and involved students from the University of Missouri-Rolla, the University of Missouri-Columbia and Southern Illinois University at Edwardsville.

Participants scheduled to compete performed 12 to 15 minute oral presentations regarding their research into concrete. Question and answer sessions followed the presentations, which were judged by members of the Missouri ACI.

"My presentation was titled 'Bond Between CFRP Sheets and

Concrete'," Miller stated. "CFRP is Carbon Fiber Reinforced Polymer which is a composite material that has been used to repair and rehabilitate concrete structures such as buildings, bridges, silos, etc. My focus is to better understand the

Eyes now shift to 2000 campaign

Far from ending with President Clinton's acquittal, the political skirmishing over impeachment now shifts from the floor of the U.S. Senate to places such as Iowa and New Hampshire.

But rather than pitting Democrat against Republican, a new battle is brewing between those GOP candidates and activists hoping to make impeachment a major issue in the 2000 presidential campaign and those wishing to change the subject as quickly as possible.

With impeachment having loomed so large for so long, it's easy to lose perspective and foolhardy to attempt any far-reaching predictions. "The most important thing to remember is things tend to be less important than we think at the time," said David Doak, a Democratic strategist. "All things seem huge when they're actually occurring."

Still, there is widespread agreement that, at the least, issues such as character, values and personal integrity are likely to play a more prominent role in the 2000 presidential campaign, in reaction to Clinton's personal peccadilloes.

Already, the spectacle of a capital seemingly consumed in eternal partisan warfare has revived Beltway bashing as a staple of presidential stump. Democrat Bill Bradley calls for restoring Americans' "shaky faith" in their institutions. Publisher Steve Forbes relentlessly plays "those Washington politicians." Republican Elizabeth Dole blames a top-heavy federal bureaucracy for usurping the role of parents.

If the widespread public repugnance toward Washington persists in 2000, it could make Al Gore, Clinton's loyal vice president and the front-runner for the Democratic nomination, a particularly inviting target for an anti-establishment challenge.

Rethinking turtles' evolution

Turtles, it turns out, may not be the most ancient type of egg-laying animal alive today, according to a controversial new analysis.

Based on physical characteristics, scientists had long thought that turtles evolved before lizards, snakes, birds and crocodiles and alligators. But the new analysis, based on the largest available collection of reptile genes, contradicts that.

"Turtles turned out to be not where they were supposed to be on the family tree whenever their genes were included in a research study," said S. Blair Hedges of Pennsylvania State University, who led the new analysis published in the Feb. 12 issue of Science.

Turtles and crocodiles apparently shared a common ancestor some 200 million years ago, according to the analysis, making turtles, not birds, the closest relatives to crocodiles and alligators.

American Airlines recovers after sickout

A sickout by American Airlines' pilots that has disrupted travel for more than half a million people appeared to finally dissipate Sunday after a federal judge said he would slap the pilots' union with a fine of about \$10 million for its role in the slowdown.

"We are pleased to report that ... hundreds of pilots have removed themselves from the sick list," said American spokeswoman Sonja Whittemore.

She said "well under 1,000" of American's 9,200 total pilots remained on the list late Sunday, down sharply from the 2,100 to 2,400 pilots that had stayed home late last week in a dispute over how quickly American is integrating its recent purchase of Reno Air.

Still, American was forced to cancel about 550 of its 2,200 flights Sunday and at least another 248 flights Monday during the Presidents' Day holiday.

American, the nation's second-largest airline, also warned that cancellations could climb again depending on the number of pilots who return Monday and Tuesday. American has now canceled nearly 6,000 flights since the pilots' slowdown began Feb. 6.

American's pilots, who earn an average of \$136,000 in annual salary, came under considerable pressure to end their sickout when U.S. District Judge Joe Kendall in Dallas announced the stiff fine against the union Saturday.

Kendall said the fine's amount would be determined at a hearing Wednesday, but in the meantime he ordered the union to set aside \$10 million for a potential payment.

Information compiled from LA-Times Washington Post

NATIONAL NEWS BRIEFS

Team members (from top left) Ryan Lantzer, Bill Siever and Tim Baldwin (sitting in chair) will compete in the ACM later

Ryan Lynch, who lived in the same suite said, "It was really nice, definitely worth the extra money."

Fire

from page 1

out flames until approximately 5 p.m. on Saturday when they were finally able to turn the building back over to fraternity representatives.

On Tuesday morning, investigators began to inspect the ruins to determine the cause of the fire.

Crowell said, "The state fire marshal, the Rolla fire marshal and the fraternity will plan at what level to investigate the cause and origin of the fire. It's going to be a difficult task, however, due to the amount of collapsed material and water covering the basement."

He added, "I cannot speculate at this time the origin of the fire. I do know from the initial reports that the fire apparently started in the basement on the west side of the house."

At Monday's press conference, several questions were asked concerning the preparedness of the fraternity in dealing with fire safety.

Crowell responded, "We have worked with the fraternities on campus to deal with fire safety issues, and we have been called numerous times to carry out inspections for the houses. They did have smoke detectors in place in the house."

In response to a question concerning sprinklers, Crowell stated, "Sprinklers have been able to stop fires or in the least contain them so less areas are damaged. Our past research has shown that they have helped." The Pike house did not have sprinklers.

Ramsay said, "The fire was first noticed by a member who was up late playing computer games. He smelled smoke, and noticed smoke coming out of the floorboard. He woke up another member, and they both proceeded to find and wake the 11 members staying at the house that weekend. When they went down to the basement,

drills regularly. In this case, the guys who were in the house at the time did exactly what they were supposed to do."

After the tragedy, members of the community quickly offered their support to the 54 fraternity members who had lost their home and most of their belongings in the blaze.

Many businesses and individuals have offered gifts of clothes and various other items. Fraternities and residential life members, and several members of the community have offered rooms for the displaced members.

The University Bookstore opened Sunday afternoon to provide members with replacement books.

Marnott offered free meals in Rayl Cafeteria. Zeta Tau Alpha and Sigma Nu also hosted meals over the weekend, and Little Caesars donated pizza on Sunday night. Triangle Fraternity sponsored a car wash on Sunday that raised several hundred dollars for Pike members.

Radio station KTTR in Rolla has also started to raise money to replace the computer lost in the blaze. They will donate \$1 for every \$10 in private funds raised. For more information, contact KTTR at 364-2525.

The president of Pikes, Rob Maxson, commented, "The community, and especially the fraternities, have been outstanding. It is very inspirational to the men of our house. We couldn't have asked for more support."

Mark Potrafka, Assistant Student Activities Director and Greek Advisor, stated, "It is incredible how the fraternities & sororities, the campus and community have opened their hearts, pocketbooks and closets to assist the members of Pi Kappa Alpha...It is very inspiring to be a part of this community. The lives of these men will get back to normal over time, but the effort will be easier because of the support they have

During Monday's press conference, Park reiterated his thanks. "It's been fantastic how the community has risen to the occasion to help. Everyone is doing their part. We share in the group's grief over the loss of Jered Adams."

Ramsay said, "The town, fraternity system, and community as a whole have been unbelievable in terms of the food, clothing and other materials they have given."

Monetary donations for the Pike members can be sent to the following address: Pi Kappa Alpha Emergency Relief Fund Mercantile Bank of Rolla 6th and Park Rolla, MO 65402.

A collection site has also been set up at 806 West 10th St. The phone number is 364-6869.

The question now remains as to where the Pike members will take up residence. Potrafka stated, "We have had many offerings of rooms and houses for the guys. I even had a woman from St. James offer four beds. Now it's a matter of getting everyone together as soon as possible, which is important in terms of brotherhood and support. A possibility for the next academic year is for the members to take up a wing in a residential hall."

Potrafka noted that when Triangle Fraternity's house burned down in 1987, the members moved into a residential hall.

On Sunday, Pike members along with 35 alumni and several parents met to discuss plans for rebuilding. According to the Pike webpage, rebuilding will start in this August with hopes of being completed in September of 2000.

Currently, the members are spread out in different houses, but they are trying to stay together. "We're trying to eat a common evening meal," Ramsay said. "A local church is opening its kitchen to allow our cook to come in and fix meals."

SHPE

from page 1

national competition.

The NTCC was held at the Westin Bonaventure. The winners were announced on Friday at the Gala Banquet, where UMR earned recognition as the only team announced twice. There were also several technical workshops and a

career fair.

"Besides winning the \$1500 for our chapter, the best part was the enormous career fair and the very beneficial workshops," stated Fabella.

The UMR chapter of SHPE has been on campus since the mid 80's. Their goals include helping Hispanic students with engineering studies, and contributing Hispanic culture to our campus.

Opinions

Do we benefit from the "silliness"?

An Editorial by Sports Editor Brad Neuvill

In the last few weeks the issue of varsity athletics at UMR has become an issue, if not to everyone, to a few people who take the time to read this Opinions section.

First off, I am a varsity athlete. I am a member of the golf team and one of Andy Laegler's "friends" as Mr. Adelsberger put it. Therefore I am a little biased. However, there are several points I would like to make in favor of supporting varsity athletics at this school.

First, while Mr. Adelsberger was correct in saying that half of his student activities fees do go towards varsity athletics, I would like to point out that Andy's contention that UMR athletics is underfunded is still correct. Nearly all of this money goes directly to coach's and support staff and very little goes directly to students. While there is not a coach here who I think does not deserve the money he or she gets it is still important to point out that students aren't getting most of the money that we all pay. There are several varsity athletic teams who, because of a small budget, can not even properly equip it's players not to mention recruit, pay for food on trips, etc.

Second, Andy made a plea to the students of the school to come out and support Miner athletics whenever possible. The only thing he said about funding was in one sentence. Andy was simply trying to make people more aware that we (varsity athletes) enjoy and perform better when we have support, as most people do in almost any endeavor.

Third, I must strongly disagree with Mr. Adelsberger's contention that "we do not benefit from this silliness." Some of the best students at this school are varsity athletes. Last semester 17 varsity athletes got 4.0's and the cumulative GPA of all varsity athletes was over 3.0. Unlike many schools, athletes at this school don't have the luxury of taking underwater basket weaving or majoring in General Studies. We are Engineers, scientists and computer scientists just like the rest of the people on campus. So, when a UMR varsity athletic team, like the swim team, goes and beats up on a school where the kids can slack off it opens a lot of eyes. People look and say "Wow, maybe there is something to studying and working hard." Kids look up to winners no matter if they are good people or bad people. But what does it say when that winner is a mechanical engineer?

Finally, I would like to say that there are many, many things that I pay for at this school which I could care less about. Every single person on campus could say the same thing. The beauty of it, though, is that there is something for everyone here. I pay money so that Mr. Adelsberger can have some of the best computers and software currently available. Do I need it? No, I can get by just fine with a low end computer and some basic programs. However, I can see the need for this and I gladly pay for it. College is not about sitting in front of your books and a computer for four (or five) years and then getting a job. It is about learning life skills, becoming involved and trying your best to have the best time of your life. If you don't believe me go ask a company recruiter if they would rather have someone who got decent grades, who was involved on campus and who participated lots of organizations or one who got great grades and no people skills. I think we all know what the answer would be and the point is that varsity athletes at UMR are doing their part to ensure their future. None of us on the golf team will be on the PGA Tour someday and even the best swimmers here (who are some of the best in the nation) will probably never see the Olympics but we are doing what everyone else does, what we enjoy.

P.S. Come to a basketball game some time. You may be surprised at how exciting a last second 3-point or a power slam dunk really is!

How about a little less pedantry?

I am writing in response to "How about a little less pedantry?" from the 2/10 edition of the Miner. In my opinion, it did little to help prevent illegal drug use. At first I thought I was going to read an article on ecstasy. Then it seemed we were talking about methamphetamine. Perhaps he meant the feeling of ecstasy rather than the drug. In the second paragraph, it appears we are suddenly talking about the drug ecstasy. But, is he trying to bad effects of ecstasy at that point or does he think ecstasy and methamphetamine are the same thing? Then we are definitely talking about ecstasy later on when he mentioned MDMA.

Feeling confused as you read my letter? He isn't giving the same order as the article. Now we're on to methamphetamine pro-

duction — it is a good thing we all know it can be dangerous now. I imagine about 25% of the student body seriously ponders making up their expected family contribution each year by dealing methamphetamine. And in the last sentence everything was grouped together as methamphetamine.

We've all been enough very facts about drugs. Please treat it as adults when discussing these issues rather than as children. And remember too, few to none of these odd synthetic drugs existed before drug prohibition laws were put in place during this century.

Letters to the Editor:

Open attitudes about sex

I realize that this is a response to a response and this kind of argument can go on forever without being resolved; but I feel I can explain some of the reasoning behind UMR's approach to spreading the word about birth control.

People, especially college students, hate to be preached to. Most of the people at this school have found new independence away from their homes and parents. Now that they are finally "on their own" to some degree, they can begin to live their lives the way they want to. Because of this, most college students will simply hate one person lecturing to them about why they should do this and that. Birth control, and more importantly, STD control is a very serious subject. However, if it is presented to college students in the way you could DIE a horrible horrible "death" attitude that most things of this nature are, then more of them will pay attention.

By having events such as the Condom Olympics, you can lighten the mood a little and get out the message that "if you're going to have sex you need to protect yourself" in a way that will make people pay attention to what you have to say. Just because a subject is serious doesn't mean you have to be dry and stiffed when you discuss it. Death is as serious of a topic as you can get, but I bet most morticians have some really funny stories they could tell you.

The one thing that I really did object to in your letter, however, was your comment about rape being a product of promiscuous sex. Were you just looking for another example of a problem so that you could have a list of three? The idea that rape is some kind of "promiscuous sex" or a product of it is the same kind of thinking that makes juries acquit rapists because of the way the victim was dressed, or where they happened to be at 2 o'clock in the morning. And don't try to tell me that incidents of rape have increased in the last X number of decades because of the decline of morals or ethics or whatever. Aside from the fact that rape has been on a general decline since the early 70's, any statistic will tell you that rape is much more likely to be reported now (and therefore be at a higher statistical rate) than 40 years ago because we, as a society, have a much more open attitude about sex.

Your comments are welcome.

Ben Rady

brady@umr.edu

Need some clean sheets?

I have lots of sheets. One obnoxious aunt works in a hotel, and my family is constantly being given a plethora of bedding materials. Every other week, however, some member of my family has a new queen-sized bed cover and pillow case. And that is why I have quite a large supply of black-white textiles in my room.

This February is Sex Awareness Month. All around campus, students can see the signs and hear the proclamation reminding us that sex is a part of the Condom Olympics and the responsibility of giving the One you love a Condom love.

Self thought to myself, "Self, why do you get involved more? You have so many sheets, why don't you help out Sex Awareness Month by giving them out?" Think about it. How nice would it be if everyone could have clean sheets to use, rather than worrying about having to clean their nasty, sweaty, secretion-laden, post-coital bedding?

Shoot! Why stop there? I could get the University of Missouri to allocate a few hundred dollars to me to buy cartons of cigarettes, new pillows, more edible underwear and a plethora of other sex-related items that I could give out in order to make University students more aware about sex. The more I thought about it I began to realize how many items the UMR TECHS had left out. Items like the aforementioned and:

- Live demonstrations of condom use
- Blow-up dolls (they're safe!)
- Instructional/educational videos/SUB movies
- And a plethora of others. And what about starting some original "Activity Months" like:
 - Feb - American Heart/Black History Month
 - Mar - American Red Cross/Tetanus/Cancer Awareness Month
 - Apr - Nat'l Alcohol Awareness/Nat'l STD Awareness Month
 - May - Date Your Mate/Fungal Infection Month

Let's get real people! Giving out condoms isn't making me any more aware of sex. I already know who does what, what goes where, and where we go to do what we do when we do it. UMR already gives out free condoms at the Health Center to whoever wants them. Why do the TECHS need to hand out these condoms to those who don't want them? Besides, if I needed to get one, I'd feel better in the relative privacy of the Health Center than in the middle of Puck.

Besides, with the "Rolla Ratio," how much of a chance will I have to actually use one?

Sincerely,

Ira J. Dunn

Saturday's home game against Southwest Baptist pivotal for Miners' playoff hopes

Lady Miner basketball splits pair; currently in ninth place in MIAA

by Randal Burd
Assistant Verve Editor

The University of Missouri-Rolla women's basketball team, while currently in ninth place in the Mid-America Intercollegiate Athletics Association conference, still can reach the playoffs with two victories in its final two games and some help from Northwest Missouri State.

Last Wednesday, the Lady Miners played a close game against Lincoln, getting ahead early and holding a slim lead to overcome 72-70. Points were spread out among the players, each team member doing her part to achieve this victory.

High scorers for the Lady Miners were freshman forward Janel McNeal with 22 points, sophomore forward Jackie Kelble with 15, senior forward Debra Gronewoller with 12, sophomore guard Jamie Schroetlin with 10, and sophomore forward Shannon Perry with six.

This win brought the Lady Miners to 9-14, 3-10 in the MIAA. This ended the Lady Miner's four-game losing streak and extended the Blue Tigers' losing streak to 14 games.

The win set the Lady Miners up for a very important battle against conference foe Washburn, who has already clinched a spot into the upcoming MIAA Championships.

The Lady Miners could not capitalize on the opportunity, however, and fell to Washburn 90-52.

Washburn took the game early, and held as much as a 36 point lead at one

point in the second half. The Lady Miners managed 23 points in the first half and added 29 points in the second to fall 38 points short of Washburn's 90.

Top scorers for UMR were McNeal with 19 points, junior guard Erika Phillips with 11, Gronewoller and Kelble both with seven, and Schroetlin with six. The Lady Miners are now ranked 9th out of 11 teams in the MIAA, having won three of their 14 games played in the conference. They have won nine out of the fifteen games played this season.

The Lady Miners' have two games this week, one Wednesday against Missouri Southern and the other Saturday against Southwest Baptist.

If UMR wins both the Wednesday game and the Saturday game and Northwest Missouri State loses their final two games the Lady Miners will then be playing in the MIAA post season.

Northwest has to play against teams who are already slated to play in the MIAA post season.

One of the teams Northwest has to play, Missouri Western, is ranked 12th in the nation, putting the pressure on Northwest to play their best ball. The other is the surging Washburn team that just trounced the Lady Miners.

The Lady Miners' next game is against Missouri Southern tonight at 5:30pm in Joplin, Mo. If the Lady Miners win, their home game on Saturday against Southwest Baptist, currently 25th in the nation, could decide whether or not the Lady Miners make the post season or are eliminated from March Madness.

Guster tallied three of his own.

Lincoln had a rather disappointing showing. The Tigers made only 26 of 62 attempts at field goals, a mere .333 shooting percentage. On the three point balls, the team did not fare much better.

The Miners took a commanding lead over the Lincoln Tigers taking a 17-point margin into the half. The Tigers could not come back, however. Despite out scoring the Miners by a score of 49 to 46 in the second half, Lincoln went down to defeat by a score of 86-72.

While this win boosted the Miners' position in the MIAA conference standings, their next game against Washburn University would negate all that the previous game gained them.

The team gave a lackluster performance making only 19 of 46 field goals and six of 22 three-point shots in the first half. Guster had an impressive night making six of his nine attempts at field goals and draining three of five three-pointers.

Once again Matthews showed his defensive prowess pulling down seven rebounds. Kevin Conkright aided Matthews reeling in an additional six boards. Both Guster and Conkright aided the team stealing the ball three times from the hands of the Ichabods.

One of the highlights of the night was the team's free throw shooting. 26 out of the team's 30 shots from the line fell. Doug Call sunk all eight of his attempts from the line, and Robertson drained four of his five shots. Fresh-

man Ben Jordan would not be outdone and put down six free throws of his own.

Once again the team found itself in foul trouble. Call fouled out of the game with five personal fouls and both Holly and Guster racked up four personals.

The Miners cut the Ichabod's lead from its high of 12 points down to three with only 1:09 left to play. Only 19 seconds later, Washburn answered the call with a bucket of its own, which quashed the Miner's attempt at a comeback.

The Miners have only two games remaining in the regular season, Wednesday night against Missouri Southern and then Saturday night against Southwest Baptist University. The team has the possibility to boost its conference record to six wins and ten losses.

The Miners must win Saturday night's game against SBU to have a shot at the playoffs because SBU is currently ranked eighth and the Miners are in ninth. This feat would mean that the Miners' conference record stands at five wins and ten losses. The decision as to whether they will be in the playoffs then comes down a very complicated tie-breaking system.

If the team wins Saturday night and also defeats Missouri Southern, they could be seeded as high as sixth in the post-season. If they do not defeat SBU, the Miners are out of any contention for a playoff berth and their season ends.

Lions and Tigers and Bears? Oh, my! Lady Miner center Janel McNeal drives the lane against a Lady Blue Tiger defender in last week's Lady Miner victory over Lincoln.

Track teams prepare for MIAA Indoor meet

by Brad Neuville
Sports Editor

The University of Missouri-Rolla men's and women's track and field teams participated in the SalukiUSA Open on Feb. 12-13 in Carbondale, Ill. The meet was hosted by SIU-Carbondale.

The meet comes just one week before the Miner and Lady Miner track and field teams are set to participate in the Mid-America Intercollegiate Athletics Association Conference Indoor Championships hosted by Central Missouri State University. The meet will be in Warrensburg, Mo., on Feb. 19 and 20.

There were several strong performances by UMR athletes at the SalukiUSA Open. On the men's side Mike Smolinski captured eighth place

in the 400 meter dash with a time of 51.7 seconds.

In the 800 meter run, Nick Ragsdale took 19th with a time of 2:03.33. In the one mile run his teammate Toby Glavin took 16th place with a time of 4:36.89.

The Miners 1600 meter relay team captured fifth place with a time of 3:32.31. The team consisted of Mike Smolinski, Jeremiah Bridges, Matt Borman and Adam Farag.

The distance medley relay team took sixth place with a time of 11:09.54. Richard Words had a strong meet in the jumps. In the long jump Words took 12th place with a jump of 21 feet one half inch. In the triple jump Words recorded 43 feet two and one half inches which was good for tenth place.

On the women's side Robin Paarberg took eighth place in the 600 meter run with a time of 1:46.28.

Kim Hoffman had a great race in the 3,000 meter run where she took fifth place with a time of 10:53.85. Her teammate Sheri Lentz placed tenth in the same event with a time of 11:09.84.

Two field athletes also had good days for the Lady Miners. Rachel Kuro took fifth place in the high jump with a jump of five feet three inches. In the triple jump freshman Alexis Collins tied for 11th with a jump of 33 feet three inches.

After the MIAA Championships both teams will be starting their outdoor season. Several team members who are redshirting indoor will be joining the team after the for the outdoor season.

TAKE TECHNOLOGY TO THE NTH POWER.

When something is too extreme for words, it's to the Nth degree. And that's the level of technology you'll experience at Raytheon.

Raytheon has formed a new technological superpower - Raytheon Systems Company, composed of four major technological giants: Raytheon Electronic Systems, Raytheon E-Systems, Raytheon TI Systems and Hughes Aircraft. The new Raytheon Systems Company is driving technology to the limit. And we're looking for engineers who want to push the envelope. Break new ground. Make their mark.

At Raytheon, you'll take technology - and your career - to the highest possible level. You'll take it to the Nth. We'll be visiting your campus soon. Contact your career placement office now to schedule an interview or check out our website at www.rayjobs.com. If you are unable to meet with us, please send your resume to: Raytheon Resume Processing Center, P.O. Box 660246, MS-201, Dallas, TX 75266. We have many exciting opportunities available and we would like to talk to you.

Gordon edges Earnhardt in classic battle of the generations

by Shav Glick

L.A. Times/Washington Post

Two of the greatest stock car drivers in history combined Sunday in the Daytona 500 to put on one of the most dramatic races in NASCAR's 51 years.

It was a classic battle of the ages. Jeff Gordon, the handsome young Winston Cup champion from Indiana, against Dale Earnhardt, the crusty old warrior from Kannapolis, N.C., winner of seven championships.

Wonder Boy against the Intimidator in the Great American Race.

There were 41 other characters in the play, but in the end, with more than stock car fans on their feet screaming for, and against, Gordon and Earnhardt as the 500 miles wound down to 11 laps of frighteningly close racing at 200 mph around the high banks of Daytona International Speedway, and down the final sprint to the checkered flag at the tri-oval.

Gordon led them all, but at times the margin was inches, and at the finish his Rick Hendrick-owned DuPont

Chevrolet was a mere .128 seconds in front of Richard Childress' GM Goodwrench Chevrolet.

Gordon, who won a NASCAR-record \$9.3 million last year, got off to a good start in 1995's season opener by collecting \$1,172,246. Gordon earned an additional \$1 million that was part of a bonus he became eligible for by finishing in the top five of last year's Winston 500. It was the largest single-day payout in motor sports history.

"I want to thank Dale for a great race," said Gordon. "He taught me a lot the last four years about how to win, and how to drive in a race like this. Maybe he's sorry now he taught me as much as he did. I can't believe how hard he worked to win. He worked me over big time."

"To me, a race win is just that much greater, it's so much more meaningful when you're battling a guy you learned from, you look up to as a competitor. Especially a guy who is as good as he is at this race track."

Five cars were in the final lead draft, but even though the other three

were fender to fender with Gordon and Earnhardt, it seemed as if it was destiny that the kid, 27, and the old timer, 47, were on the point.

"They (fans) got their money worth today," said Earnhardt, pleased with the fight he put up even though he lost. "Those last 10 laps were awesome. They were bumping and slamming and bumping and slamming. Off (Turn 2) we got sideways a couple of times. It was pretty physical. I'm pretty happy to get second. I just got beat."

Kenny Irwin, a second year driver, finished third in the first Ford, followed by Mike Skinner, Earnhardt's teammate, and Michael Waltrip, in Chevrolets.

An apparent tactical mistake involving Roger Penske's two drivers, Rusty Wallace and Jeremy Mayfield, took them out of contention after Wallace had led 104 of the 200 laps.

When Bobby Hamilton spun into the backstretch wall with 22 laps remaining, Wallace and Mayfield did not pit, while Gordon, Earnhardt and the others took on new tires.

After the pit stops, Gordon was seventh and Earnhardt eighth. On the restart, Earnhardt charged to third on the first lap, right behind Wallace and Mayfield, but two laps later Gordon shot past Earnhardt for second as Mayfield dropped back.

On lap 189, Gordon and Earnhardt, working the draft together, went three-wide with Wallace to take the lead from him. Wallace was stunned at the move Gordon made, racing almost to the grass to avoid a lapped car.

"Gordon got me on the apron," Wallace explained. "I just couldn't block him off enough. I thought I had him blocked off, and he just kept going. I thought he was gonna drive right into the back of (lapped driver Ricky) Rudd on the apron."

"I had him pinned down there, but he was going right out on the grass. I thought 'Man, I'm not going to wreck a bunch of cars, and I pulled up and he got me. He just bounced off the apron onto the track in front of me.'"

Gordon, holding the inside line,

raced three-abreast with Mike Skinner and Wallace before forging ahead going down the long backstretch.

"I was pretty worried right there, racing with Dale's teammate and his best pal (Wallace), but I was carrying a lot of momentum. I was kind of lucky that Dale and Mike couldn't hook up and push Dale past me."

Earnhardt said he had the same thought, but circumstances never gave him the opportunity.

"I wanted to get with Skinner there at the end and try to work with him, but I couldn't, and he couldn't get with me," he said. "I was trying all I could to get to the 24, but you can't take a car out from between one of us or move him from the outside lane to the inside lane. If we had worked together we would have, but you just don't move cars over and say, 'Excuse me, I'm moving in here.'"

Gordon said his secret, one he learned from Earnhardt, was that instead of trying to extend his margin over Earnhardt, he would try and keep the margin as close as possible.

"When you look in your mirrors on the last couple of laps at the Daytona 500 and all you can see is that black No. 3, you've got to be apprehensive," Gordon said. "I knew Dale was trying to set me up on every lap. He tried to let me get a little lead so he could come sweeping off the second turn banking and run me down, or make a run at me coming off (turn) four heading for the tri-oval."

"I was watching him in the mirrors so much I had to be careful to watch where I was going and not get out of my line. Every time I saw him backing up, I would slow down. It got so I almost had to use my brakes on that last lap, but you don't want him to get that clean air and get a run at you."

The victory was Gordon's third in a row after triumphs in the final two races last season at Rockingham, N.C., and Atlanta. It was also his 43rd career Winston Cup win in 190 starts, and his second Daytona 500 victory in the last three years.

Gordon, who qualified first at 195.067 mph, led the first lap, five in mid-race and the final 11. Six others led the race, including Wallace with 104 laps, Skinner with 31 and Bobby Labonte with 20.

Verve

Post-Valentine's Day blues got you down?

by Harshal Deshpande
Verve Writer

With love in the air and in their spirit, people (I am talking only of those people who believe in the Valentine's Day) started preparations for the grand inauguration of a new love life or the same boring day, because who knows if one will succeed in getting a date. Well, aside from the failures, people are very optimistic, almost to the helm of it. "Yes, I have the qualities of being a Romeo." "I am not so good looking, I have a squint in my right eye, and 100 pounds hanging down my belly, but hey, look at my nature, I can easily find the most handsome man for myself." "I am no good as a human, am the dumbest in the class, but look at my 'Macho Body' (if it is the guy) or my 'Sexy figure and look' (if it is the lady)."

For the February 14th grand event, whatever shortcomings of one might think they have are undermined and every person gets ready to project himself/herself as the "HIT" mate. Everyone tries to find the best person in oneself. I won't say that there is not a good human being in everyone, but some have to dig too far in themselves to find it. So, if you cannot find a good human in you to present on Valentine's day, don't worry, even the bad human can sell on that day. You just have to find the matching pair.

So, on February 9th, the love seekers are the busiest people in the world. The list of things to be completed the 14th seem to be endless. Those who already have their mates are busy ordering a grand chocolate

cake, searching the costliest and the best jewellers in town to find the jewel for their "Sweet Heart," searching for the hottest deals (which at least have the words, "for the best Valentine couple" on them), like the deals for air travels, theme parks, mega-movies, fine restaurants and stuff like that. Their goal of life until the 14th is "Love, King size." Well that's good! But something's going bad some

their soul mates, or just a romantic fling, at what is being billed as the world's largest Valentine's Day party. The event was orchestrated by a non-profit, match-nudging organization called "American Singles" and involved 20 simultaneous parties taking place on five continents from 4:00 p.m. to 8:00 p.m. CST Sunday. Each of the party sites was a cyber cafe featuring computer links to the Internet.

Cameras that can broadcast live, real-time video onto the web were installed in each of the cafes. A company called Logitech provided the cameras, and along with CS Network and American Singles, put on the global bash. Shy love seekers peeked in on the parties by logging on to the Internet from their home computers. Once connected to the festivities, messages were able to be conveyed to revelers from any computer.

where. Ah! The credit cards are piling up. Anything for love.

The other kind of people are the ones who are in it to search for a date/lifetime: the "Singles". For them, the resources for finding a mate are endless. Cupid had the arrow for these type of people. Hooking up to the web and attending the Cyber parties is most popular among these guys and gals.

Here are some of the facts about the Gala orchestrated on this year's Valentine's Day. From Cafe Orbital in Paris to Web Cafe in Bogota and Club-I in San Francisco, love wasn't just in the air this Valentine's Day, it was all over cyberspace. Several million loveless singles came looking for

ers now every body is prepared for the Grand event to happen. Up comes the sun on February 14th. Waking up is a very sweet thing that morning. It seems like the air is full of freshness. The world seems very beautiful. One can hear the birds chirping even among the deafening noises of the city. Minds and spirits are full with joy. Excitement about meeting the right person of the opposite sex fills in the nerves.

The day starts with the top gear. But now comes the time for executing the activities already planned. Some prepare things to make a happening appear like a mere coincidence, so that it appears as if God has clicked on

the "meeting" button for them or they are made for each other and the rest of the synchopancy appears natural.

Some go directly and talk to the person of their dreams with a big heart or a bouquet of red roses and all kinds of love showing devices available in the market. Some show the illogical discourtesy of walking into the person of their dreams with a sense of pride and ego, as if "I am doing a favor by offering you my love, baby." This is not true just with the macho men, but also with the fairer sex. But the ways of presenting ones love are numerous and all with a distinct image of uniqueness. And do all of them work?

That's what is left to think about

at the end of the day. Some find their soul mate, for those who believe that love is to be shared and expanded in the human kind. Some meet failures after a tough day of toiling. But, hey, at least there is some kind of satisfaction that you have conveyed your love to the person whom you love.

The bars are filled with people; some enjoying the company of the loved ones and some drinking the hell out of oneself to drown their griefs. But what ever the result may be, Valentine's Day exhibits all the potential of blues it brings to the love life of the masses. So what are you guys thinking now? Should there be another Valentine's Day in the year or is one one too many?

Tips for stress management

by Randal A. Burd, Jr.
Assistant Verve Editor

It is already the sixth week of classes. Over five weeks of lectures, projects, homework assignments and tests have already been survived. Midterms and spring break are not far around the corner, after which summer will be just a few weekends away. The scenario I have just given you is familiar to all of us, but it fails to mention the detailed work and frustration involved in completing those homework assignments, projects and tests. Now is the time when the stress builds up. I see it in the faces of those I pass on the way to my classes. The understanding of this stress becomes very clear when you are sitting in the middle of it.

Let me give you an example of a stressful schedule. Having had a stressful semester this past fall, I am working hard to complete two classes from last semester and taking thirteen hours on top of this. One of these incomplete classes consists of seven more essays, an 8-10 page term paper over material first introduced to me in this class, and a final exam. Work for the other class I have to complete now consists of ten pages to finish a research paper, but all the work together adds up.

Now one may say, "Thirteen hours? I am taking 20 and doing great." Well, all I have to say is — good for you. These thirteen hours consist of the second semester of a foreign language class, a capstone seminar, a mid-level psychology course and a British literature course. Granted, as you probably figured out, I am a humanities major. Knowing the stress I am experiencing at this point makes me appreciate the tremendous amount of stress associated with the mathematics-heavy courses of engineering and computer science related disciplines. Chemistry and physics have a stress factor all their own. All of this stress, if ignored, can seriously affect your health.

Here are a few tips to keep the stress factor to a minimum:

- 1) Attend Class. Nothing can relieve the stress of learning new skills and information more than being present when the information is discussed. Despite the impression you may have received from my article last week on attendance, attendance is a very important part of the academic process.
- 2) Don't Get Behind. Use your time wisely. Turn in all written assignments when they are due and do the reading assignments as they are assigned.
- 3) Get Studying Done Early. Start studying for your tests and quizzes before the day before the test. Feeling prepared is an excellent way to keep the headaches away.

And one last important piece of advice — give yourself some time away from schoolwork. Get things done during free time between classes, labs, and meetings so you will have a couple of evenings or maybe a weekend to spend time with friends or family, see a movie, or sit in front of the TV. Time away from schoolwork is very important. Just make sure you choose times when something isn't needing to be done immediately. Yes, those times do exist... sometimes you just have to look for them — hard. So take this advice with a grain of salt and good luck on the rest of the semester.

Spring Film Fest: Afterglow

Nick Nolte, Julie Christie, Leslye Flynn, Boyke, Jonny Lee Miller. Directed by Alan Rudolph.

Afterglow is a sophisticated sexual roundelay involving two unraveling Montreal couples. Phyllis, washed-up horror-film star wallowing in sardonic self-pity, is married to Lucky, a very handy handyman who specializes in unclogging pipes. On the other side of the generational fence are hot-blooded Marianne and her husband Jeffrey, an icy corporate prigg with a warm spot for older women. Rudolph deftly juggles the interrelations and missed connections of his complicated quartet. Fluidly shifting gears from bluesy melancholy to knock-down farce. 1997-R.

This film will be shown on Tuesday February 23 at 7:00 p.m. in LeCom Theatre of Charleston Hall. There is no charge.

UMR Toastmasters rank high internationally

by Brian Groff

UMR Toastmasters

The UMR Toastmasters club number 4850 is currently ranked as the fourth most active internationally among 4,331 clubs in their category. The category which comprises almost 50 percent of all Toastmasters International clubs.

The UMR Toastmasters club is an opportunity for students to informally improve their communication abilities. Toastmasters International includes corporate, community and student clubs around the world. Hence, members can continue their development after they leave the university.

The organization follows a step-by-step program in which members steadily develop abilities while working at their own pace. Many students who join the club immediately recognize the value and importance of having these highly effective communication skills for both school and the professional work place.

Points are awarded to the club whenever an individual joins the organization, completes one of the communication and leadership programs or serves as an officer. There are several other opportunities for the club to score points by submitting newsletters, officers reports, and semi-annual membership reports to the international headquarters.

This year alone, the UMR Toastmasters has had four of its members achieve the status of Competent Toastmaster (CTM), meaning they have each completed the first ten

speeches in the education program. Those members are Vanessa Goodwin, Brian Groff, Mike Henry, and Brad Papa. They also achieved the status of Competent Leader (CL), meaning they have presented two educational seminars. Several other members will be receiving their CTM, CL or Advanced Toastmaster (ATM) status before the end of the winter semester.

With the accomplishments of these individuals and the other club members' efforts combined, the club has beaten their previous record of 10,000 points and currently has nearly 13,000 points.

"We are in the running for top honors in our category. More importantly, the members are honing communication and leadership skills which will make them a success in their technical careers," commented club adviser and

founding member Dr. Steve Watkins of the Electrical and Computer Engineering Department.

What makes UMR's chapter stand out among the others is the fact it is almost entirely comprised of undergraduate and graduate students. The UMR Toastmasters meet every Thursday night from 6:00 - 7:00 PM in the Campus Support Facility (CSF) Room 109.

Also, the University Orators, another Toastmasters Club which includes students, campus faculty and staff, and community members, meets every Monday morning from 11:30 - 12:30 in the Meramec Room on the second floor of the University Center East (UCE).

***Did your organization participate in an event and do well?**

***Do you have current information that you would like the campus to know that is not in the form of an ad?**

***If you would like to see an article about your organization in the Organizational Update section of The Missouri Miner, e-mail leong@umr.edu.**

Organizational Update

ASUM hosts dinner and Lobby Day

by Andy Laegeler
ASUM

Associated Students of the University of Missouri (ASUM) is back in the swing of things this semester. Coming up the 18th of February, we have a dinner with UM System Lobbyist Jim Snider. The dinner is free of charge to students, administrators and staff. Also, at the end of the month, we will be hosting the 12th Annual Student Lobby Day in Jefferson City. This event allows student organizations to "show off" their achievements to the members of the Missouri Legislature.

If you are interested in either of these events, please contact our office at asum@umr.edu, or 341-4970 for more information or reservations.

With the selection of two new Legislative Interns last semester, Tim Laycock and Traci Walker, ASUM's lobbying efforts are at a premium this year. There are several exciting student issues being proposed this legislative session.

Last year, legislation was

passed to eliminate state sales taxes on all textbooks sold in University bookstores. This year, there is further legislation to remove that state sales tax in all bookstores outside of University property in Senate Bill 33

feels that the Student Representative should be allowed in those meetings.

Therefore, ASUM's interns are lobbying Senate Bill 238 and House Bill 321 which would include the Student Representative in those closed meetings.

Missouri and Mississippi are the only two states where one must be 21 years of age to serve on a jury; although, the federal government lowered jury service for federal courts to 18 years of age in 1975. ASUM supports lowering the age for jury duty in the state courts to 18. There are numerous bills for this legislation this session: SE 73, SE 253, SE 259 and HE 448.

In addition, ASUM will be actively supporting Mission Enhancement and Capital Improvement allocations as well as general allocations for the University of Missouri System.

ASUM monitors several other bills that are pertinent to students and information about the bills listed here as well as the ones we monitor are available in our office, 212 University Center West.

and in House Bill 227.

Through legislation ASUM supported in years past, there was a position allocated for students on the Board of Curators. However, there was a stipulation along with that legislation that prevented the Student Curators to attend closed meetings of the Board. Since Board business is discussed in those meetings, ASUM

Zero Tolerance... "Know it or Take a Hike"

by Jennifer McCann
UMR TECHS

Have you ever heard of the Zero Tolerance Laws? Does Missouri have a Zero Tolerance Law? Have you ever driven a car after drinking alcohol?

These are a few questions off a survey taken by a group of students on our campus two weeks ago. The survey, actually a pre-test, is part of a Zero Tolerance campaign. "Know It or Take a Hike", which our community has been chosen to participate in this semester. The program is sponsored nationally by the BACCHUS and GAMMA Peer Education Network, SADD, the US Department of Transportation and the National Highway Traffic Safety Administration and locally by the TECHS, other campus representatives, law enforcement officials, high school representatives and community groups.

The goals of the "Know It or Take a Hike" campaign include educating youth about the Zero Tolerance Laws, encouraging enforcement and education of the law, promoting alcohol free activities and reducing the incidence of youth in drinking and driving.

The project began two weeks ago with the pre-test here at UMR, to be given at Rolla High School in the

next few weeks. Next, students will notice information about the Zero Tolerance Law on their campus and throughout the community. Also, the TECHS will put on programs and distribute information on campus about the law. In May, a post-test will be given to the same students who took the pre-test. Past campaigns have shown a dramatic increase in students' knowledge of the Zero Tolerance Law at the end of the campaign.

Now, back to the questions I posed above. All 50 states have adopted Zero Tolerance Laws for youth concerning operation of a motor vehicle after alcohol consumption. It is illegal in every state for anyone under the age of 21 to purchase and publicly possess alcoholic beverages. Consequently, it is illegal for persons under 21 who have been drinking to drive. A zero tolerance law makes it illegal in and of itself for persons under the age of 21 to

drive with any measurable amount of alcohol in their blood. As of last July, all states adopted BAC (Blood Alcohol Content) levels of .00, .01 or .02 for drivers under 21.

These laws allow police officers to require a breath test from a driver under the age of 21 if the officer has probable cause to believe that the driver has been drinking. In Missouri, if the driver is under 21, it is his or her first offense and the BAC is at or between .02% and .09%, the license will be automatically suspended on the spot for 30 days. For 60 days after the suspension, the driver will only be allowed to drive to and from work and alcohol education classes. A second offense results in a one year suspension. All violators are mandated to take an alcohol education course before they get their license back.

Questions? Feel free to contact UMR TECHS at 341-4225 or at umrtechs@umr.edu.

Looking for extra money?

The Verve section of The Missouri Miner is looking for enthusiastic, creative and "vicious" writers. If you want to join in the fun and make some good money in the process, e-mail Jeffrey Leong at leong@umr.edu and come to the Miner's weekly meeting on Thursdays at 4:30 p.m.

Team members (from top left) Ryan Lantzer, Bill Siever and Tim Baldwin (sitting in chair) will compete in the ASUM...

Ryan Lynch, who lived in the same suite said, "It was really nice, definitely worth the extra money."

KMNR Top 15 Countdown: Songs for the Jetset, Vol. 2

by Trish Gregg

KMNR Music Director

BAND - album - (label) / Recommended if you like

- 1 BUILT TO SPILL - Keep It Like a Secret (Warner Bros.) / Modest Mouse, Pavement, Neil Young
- 2 APPEASED CAST - The End of the Rind Wars (Deep Elm) / Knapsack, Jimmy Eat World, Get Up Kids
- 3 ANI DI FRANCO - Up up up up up up (Righteous Babe) / Toni Amos, PJ Harvey
- 4 KITTY CRAFT - Beats and Breaks From... (Kindercore) / Bunny Grunt, Gaze / mellow pop-punk
- 5 MXPX - Let It Happen (Tooth & Nail) / Limp, Chix Diggit, Less than Jake / pop-punk
- 6 THE GLORIA RECORD - S/T (Crunk!) / Mineral / Mellow and sedate
- 7 DIRTY POODLE - S/T (Put it on a Cracker) / Mellow rock, wispering lyrics
- 8 VARIOUS ARTISTS - Songs for the Jetset II (Jetset) / Theme from Austin Powers, Air / catchy pop
- 9 JASON FALKNER - Can You Feel (Elektra) / Jellyfish / upbeat British invasion
- 10 PINEHURST KIDS - Minnesota Hotel (4 Alarm)

- 11 JIMMY EAT WORLD - Jimmy Eat World e.p. (Fueled by Ramen) / Sensefield, Sunny Day Real Estate, Knapsack
- 12 TAKAKO MINEKAWA - Cloudy Cloud Calculator (Empower Norton) / Cute girlie pop electronica
- 13 CROPDUSTER - S/T (Crop duster Music) / Country with punk influences
- 14 LAGWAGON - Let's Talk About Feelings (Fatwreck Chords) / The Offspring, NoFX, Blink 182 / punk
- 15 MICHAEL - You Must Be This Tall (Goodblonde/Ghostmeat) / The Promise Ring, Toad the Wet Sprocket, Fugazi

BUILT TO SPILL

Built to Spill has been a college favorite for the past nine years and it looks as though "Keep It Like a Secret", their second major label release, just may cross them over into the main stream. Fore-fronters of the indie rock scene, this trio from Boise, Idaho combines brilliantly orchestrated melodies and rhythms with good old-fashion rock. With influences from Neil Young to Pavement, Doug Martsch's stylings range from melancholy to up beat guitar driven rock. You can hear Built to Spill or similar rock on the following shows: Josh (Wed. 2:30 p.m. - 5:30 p.m.), Amy

(Tues. 2:30 p.m.-5:30 p.m.), Jason (Sun. 9 p.m. - midnight).

SONGS FOR JETSET Vol. 2

Do you like pop? Well, this is the album for you. Not only does it explore sounds from relatively unknown artists, it features explosive, happy, upbeat "fun" pop. With artists

including Milky, Death By Chocolate, Wallpaper and Tomorrow's World (I had never heard of any of these bands!) you can get a taste for the group's sound with out having to commit to a full length album. So what does this pop sound like? It is reminiscent of the psychodelic pop movement of the 60's and has everything

from surf pop to mellow folksy pop. If you found yourself singing along with Mike Myer's BBC song at the end of Austin Powers, this CD is a definite must buy. You can hear Songs for the Jetset or similar pop on the following shows: Trish (Mon. 2:30 p.m. - 5:30 p.m.), J.B. (Tues. 6 a.m. - 9 a.m.).

Rocko's Review:

Gattaca - a different kind of Sci-Fi flick

by Justin Sutherland

Reviewer-at-Large

Gattaca is neither a new movie in theaters, nor is it a particularly new video release (even though it resides in the new release section). Rather it's a movie that sits on the shelf, frequently being passed up because it does not appear to be all that appealing. But upon closer inspection, Gattaca turns out to be Andrew Niccol's first major project.

Niccol is also known for his work on *The Truman Show* as writer and producer. Before *The Truman Show* was in the spotlight, though, Gattaca was garnering its own attention through film festivals.

The Take:

Vincent (Ethan Hawke) was a child that was conceived in a natural way. But in a world where genetic enhancements have become a normal route for child conception, Vincent is branded a "Godchild" and outcast as an "Invalid" because of his inherited physical frailties.

Throughout his life, Vincent has only one dream: to go into outer space. However, his status as an invalid is a major roadblock to fulfilling his dream. To overcome this roadblock, Vincent assumes the identity of Jerome Morrow (Jude Law), a "Valid" person that was crippled in an accident.

Ethan Hawke as Vincent in Gattaca
photo courtesy of Columbia Pictures

pled in an accident.

Vincent gains prominence at the aerospace-specialized Gattaca Corporation using Jerome's genetic identity. Everything works perfectly for Vincent until a mission leader in the company is murdered. This sets off a chain of events that could expose Vincent for what and who he really is.

Rocko's Two Cents:

All too often we associate science fiction movies with some sort of invasion from space-whether it be an asteroid or alien. The fact that Gattaca was neither of these is part of its appeal.

The best part of Gattaca is that it was not written as a bizarre tale of what is to come should humanity choose to genetically enhance itself. Instead, the movie takes a more down to Earth look at genetic engineering and the cultural shifts-such as checking a date's DNA from a kiss to determine their worthiness as a mate-it would make as a result. It is for such a gripping and sometimes scary tale: it is all within the realm of human possibilities.

So, the next time you find yourself in the video store, give Gattaca a chance. You might be pleasantly surprised, especially if you are tired of recent trend in blockbuster science fiction flicks.

Missy's Music Review: Jimmy Eat World

by Missy McLean

Verve Writer

This week for the music reviews, I decided to review just one album. Actually, it's not even an album. It is an EP. Basically, it's just a single with more songs than a single, or an album with less songs than an album. Confused? Yeah, me too. I decided to do a track-by-track listing. Mostly, it's just because I really like these guys and want you to know about them.

"Jimmy Eat World" self-titled EP, Jimmy Eat World

I have long been a fan of Jimmy Eat World. Hailing from Tempe, Arizona, the former "precocious underground/indie band" has learned to deal with shades of success. They started out as typical teenagers in a band, playing their friends' parties and rocking out for gas money and a place to crash.

Their first album release, "Jimmy Eat World", was put out by the independent label, Wooden Blue Records, and is currently out of print. Their second album release, "Static Prevalents", was released on Capitol Records, a far cry from the indie scene that they began in. A work of art, "Static Prevalents" is one of my favorite albums of all time. A very emotionally moving album, it reminds me of the early sounds of Sunny Day Real Estate, Camber and

Sense Field.

This self-titled EP, "Jimmy Eat World", is the precursor to their latest Capitol Records release, "Clarity". The EP is being put out by a Gainesville, Florida label, Fueled by Ramen. Two of the songs on the five song EP are on the new album.

Track listing and comments:

1. *Lucky Denver Mint*: Hard drum beats. Layered vocals. Very emotional. Very pretty. Makes me want to learn to play the drums.

2. *For Me This Is Heaven*: My favorite track on the EP. Ingenious use of vocal weaving. Much like what I would imagine "Heaven" would sound like. My favorite quote from the song: "if i don't let myself be happy now then when? if not now when? when the time we have now ends."

3. *Your New Aesthetic* (demo): Again, heavy on the drums and the bass. Not as heavy on the vocal layering as the rest of the songs.

4. *Softer*: Driving guitar and bass. Sounds more like "Static Prevalents". More layered vocals. Tasty.

5. *Roller Queen*: This song only has Jim Adkins (lead vocals) on vocals and guitar. Neat distortion at the end of the song. This was a pleasant end to a great EP.

I'll admit I'm a little biased because I really like these guys, but I'll give them five stars.

Rating: *****

DAYS

UNTIL ...

EPISODE 1
THE PHANTOM MENACE

MOROSCOPES

by Boris and Natasha

Aries (March 21 - April 19): Life's taken an interesting turn lately, and you're wondering if it's for the best. It's best to just let things be. Being patient and letting things take their course usually leads to the best solution.

Taurus (April 20 - May 20): You're worried about grades lately. Don't. Taking it slow and one step at a time, without being so tense will help the problem tremendously.

Gemini (May 21 - June 20): Feeling like you don't contribute enough? Find a good cause and start helping out. Don't add the stereotype of indifferent college students.

Cancer (June 21 - July 22): You're too anxious for the start of spring. Beware that it's still winter and you'll have to put those shirts back in the closet soon.

Leo (July 23 - August 22): Have your eye on someone new? Let this new love happen on its own. Too much pursuit will make him or her shy away.

Virgo (August 23 - September 22): Big decisions were made this last weekend and you're still questioning the outcome. It's always best just

to wait and you'll soon find out if you did the right thing. It's going to be hard, but patience teaches us all many things.

Libra (September 23 - October 22): You thought Valentine's Day was depressing? Just wait. It might be best to lock yourself in a closet this weekend and quietly moan.

Scorpio (October 23 - November 21): Your car's going to break down on the way home this weekend. HAVE THE BRAKES CHECKED!!!

Sagittarius (November 22 - December 21): Blow bubbles more. Do something relaxing and soothing that others will laugh at. Sometimes it's good to be on your own.

Capricorn (December 22 - January 19): Get a pet. You're tired of so many people at your place, but don't want to be alone. You're not crazy if you talk to your dog. You're crazy if you talk to your dishes.

Aquarius (January 20 - February 18): You're counting the days until Spring Break. Don't neglect your class work in anticipation of far off relaxation.

Pisces (February 19 - March 20): You're making decisions that will have a profound affect on your life. Don't do what we say. Think it through yourself.

Team members (from top left) Ryan Lantzer, Bill Siever and Tim Baldwin (sitting in chair) will compete in the ACH...

Ryan Lynch, who lived in the same suite said, "It was really nice, definitely worth the extra money."

Financial Aid

RURAL MISSOURI, INC.

If you have been employed as a farmworker in the past two years, you may be eligible to receive free educational fee assistance for your education. If you have worked as a farm, orchard, greenhouse or poultry/egg production employee, you may qualify. To obtain details and the field representative closest to you call 1-800-234-4971.

RMI STARTS NEW SCHOLARSHIP PROGRAM

Rural Missouri, Incorporated has established a scholarship program to assist individuals in achieving their educational goals. The scholarships are available to RMI training program participants and/or borrowers in RMI's loan programs (and their dependents). A maximum of ten (10) scholarships up to \$500 each will be awarded each year. Financial assistance is limited to tuition, books, class materials and associated cost. Applications will be accepted throughout the year. Please call (573) 635-0136 for an application or more information.

CHRYSLER ANNOUNCES NEW SCHOLARSHIP PROGRAM

With an eye toward assisting outstanding college bound students, Chrysler Corporation recently awarded 1,000 grants to 40 recipients through its new Junior Golf Scholarship Program. Even though the majority of the winners play golf, all selections were made based upon their academic and extracurricular effort. For more information on this exciting program call 1-800-856-0764.

DEPARTMENT OF THE ARMY U.S. ARMY HEALTH PROFESSIONAL SUPPORT AGENCY

Let the Army pay your way through Medical, Dental Optometry School, or a Doctoral level degree in Clinical/Research Psychology. Scholarship includes: full educational fees, required books, lab fees, required equipment rental, \$865.00 monthly stipend. FOR MORE INFORMATION ON ARMY SCHOLARSHIP OPPORTUNITIES CONTACT: CAPTAIN DINO L. MURPHY OR MRS. SHARON MACKENZIE AT 1-800-829-0924.

KIDS' CHANCE INC. OF MISSOURI

What is Kids' Chance? It is a non-profit corporation developed by interested employers, attorneys, laborers, insurers, third party administrators, government officials, health care representatives and rehabilitation providers. The purpose of Kids' Chance is to provide educational scholarships to financially assist the education of children of workers who have been seriously injured or killed in Missouri work related injuries. Which Children are Eligible for the Scholarship? To be eligible for the scholarship the child's parent must have sustained a serious injury or fatality in a Missouri work related accident covered by workers compensation. The parent's injury or death must be compensable under Missouri Workers' Compensation Law, Chapter 287 RSMo. The child must be between the ages of 16 and 25. When do you apply? Applications are accepted at any time. KIDS' CHANCE Scholarships are awarded on basis of need throughout the year as funds are available. The deadline for accepting applications for a one year scholarship (fall and spring semesters) is May 15th. The deadline for accepting applications for the spring semester only is October 30th. Applications available in the Student Financial Assistance Office, G-1 Parker Hall, Rolla, MO 65409-0250 or by calling 1-800-484-5733 - code 5437 (KIDS).

THE JOHN GYLES EDUCATION FUND

The John Gyles Education Fund is a private, benevolent endeavor established eight years ago with the help of a Canadian/American benefactor. Each year financial assistance is available to full-time students in both Canada and the United States. Full Canadian or American citizenship is a requirement. Awards are available to both male and female students for all areas of post secondary study. A minimum GPA of 2.7 is required. Criteria other than strictly academic ability and financial need are considered in the selection process. Selected students will receive up to \$3,000. Filing dates for mailing applications in 1999 are April 1st, June 1st, and November 15th. To receive an application please send only a stamped (US 33 cent), self-addressed, standard letter size (No. 10) envelope to the following address: The John Gyles

Education Fund, Attention: The Secretary, P. O. Box 4808, 712 Riverside Drive, Fredericton, New Brunswick, Canada E3B 5G4.

AMERICORPS EDUCATION AWARDS PROGRAM

The AmeriCorps Education Awards Program offers members the standard AmeriCorps education stipend of over \$4,700 for one year of community service, but unlike AmeriCorps USA, it does not provide a living allowance or other benefits. For information on this program contact the Student Financial Assistance Office, G-1 Parker Hall.

AIR FORCE SCHOLARSHIPS FOR MEDICAL STUDENTS

ELIGIBILITY CRITERIA: Applicants must be U.S. citizens, of good moral character, physically qualified for an Air Force commission, currently enrolled or accepted for the next enrolling class of an accredited allopathic school or osteopathic school within the United or Puerto Rico, and not contractually obligated to serve a state or other party upon graduation. Interested persons should contact their Air Medical Recruiter for more information and/or interview and application. (573-446-6750)

STATE SPONSORED MISSOURI NATIONAL GUARD EDUCATIONAL ASSISTANCE PROGRAM

Any member of the Missouri National Guard who is serving in the Missouri National Guard satisfactorily, and who possesses the qualifications set forth in application may be awarded educational assistance to an approved public institution or an approved private institution, as those terms are defined in RSMo Section 173.205, of his/her choice while he/she is a member of the Missouri National Guard. ELIGIBILITY CRITERIA: Is a member of the Missouri National Guard is certified by the Unit Commander that the soldier/airman is participating satisfactorily in required training of the Missouri National Guard. Has not previously received a bachelor's degree from an accredited post secondary institution. Has achieved and maintains a cumulative grade point average (GPA) of at least a 2.5, grade point on a 4.0 scale, or the equivalent on other scale approved by the program adminis-

trator, while in a secondary school. Is enrolled, or has been accepted for enrollment, as a full or part-time undergraduate student in an approved private or public institution. Has never been convicted in any court of an offense which involved the use of force, disruption, or seizure of property under the control of an institution of higher education to prevent officials or students in such institutions from engaging in their duties or pursuing their studies. Has not enrolled or who intends to use the award to enroll, in a course of study leading to a degree in theology or divinity. Has not received Educational Assistance under the MONGEAP which exceeds or will exceed financial assistance for more than a total of ten (10) semesters or their equivalent. Application deadlines: Summer Semester taking applications from January 1 - April 30. Applications available in the Student Financial Assistance Office, G-1 Parker Hall.

ROTARY CLUB OF FLORISSANT LOAN PROGRAM

The Florissant Rotary Club wishes to inform students of a loan program which is available for eligible students through the Florissant Trust. This program is part of an overall effort by the Florissant Rotary Club to assist in the education of qualified students within the Florissant Rotary's service area. ELIGIBILITY CRITERIA: A candidate must reside in the Florissant Rotary Club service area. (North St. Louis County, north of Highway 270) A candidate must have completed a minimum of 60 semester hours at an accredited college or university. A candidate must complete the Florissant Trust Loan application and provide all required materials. A candidate must be enrolled for a minimum of 12 semester credit hours during the semester of the loan period for a bachelor's degree, or 10 semester credit hours for a graduate degree. Interested students contact: Mr. Ronald Schmidt, 801 St. Francois Street, Florissant, MO 63031 or call (314) 921-5100.

SOCIETY OF FIRE PROTECTION ENGINEERS GREATER ST. LOUIS CHAPTER (3 \$1,500.00 Scholarships awarded)

The Greater St. Louis Chapter of the Society of Fire Protection Engineers (SFPE) is happy to announce its Fifth Annual Engi-

neering Scholarship Program. Our intent is to promote the study of all engineering disciplines to help develop individuals with the knowledge and ability to meet the future technical needs of our country and the world. BASIC CRITERIA: Native St. Louisian, or be interested in working in St. Louis after graduation. Full-time student with minimum 60 credit hours in an engineering curriculum at a BS or MS level. Financial need, past academic achievements, community involvement, and interest in Fire Protection Engineering will be considered in the scholarship selection process. The goal of this scholarship fund is to provide educational assistance to students who are seeking a degree in engineering and show an interest in the Fire Protection industry by encouraging students who are inclined to become a Registered Professional Engineer and practice in the St. Louis area. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Applications deadline: February 26, 1999.

JAMES MADISON MEMORIAL FELLOWSHIP FOUNDATION

The Foundation is seeking applicants with a demonstrated commitment to a career in teaching American history, American government, or social studies at the secondary level. Applicants for a fellowship must be: A U.S. citizen or U.S. national; and A teacher, or planning to be a teacher, of American history, American government, or social studies at the secondary school level. JUNIOR FELLOWSHIPS, awarded to students who are about to complete, or have recently completed, their undergraduate course of study and intend to pursue full-time graduate work. SENIOR FELLOWSHIPS, awarded to experienced teachers who want to pursue graduate studies on a part-time basis through summer and evening classes. For additional information and detailed regulations about the Foundation and the fellowship program, or to receive an application packet, please visit the Foundation's web site: <http://www.jamesmadison.com> or call Toll-free at: 1-800-525-6928.

AMERICAN ELECTROPLATERS AND SURFACE FINISHERS SOCIETY

The American Electroplaters and

Surface Finishers Society offers scholarships to upper class undergraduate and graduate students who are interested in careers in the surface finishing field. **REQUIREMENTS:** Undergraduate students must be studying in metallurgy, metallurgical engineering, materials science or engineering, chemistry, chemical engineering, or environmental engineering. Selection factors include achievement, scholarship potential, motivation and interest in the finishing technologies. Must be a full-time student during the academic year the scholarship is received. Financial need is not a factor. Application available in the Student Financial Assistance Office, G-1 Parker Hall. Application deadline is April 15, 1999.

TAG AND LABEL MANUFACTURERS INSTITUTE, INC.

This program is for qualified third and fourth year college students who are pursuing an education leading to careers in the tag and label manufacturing industry. **REQUIREMENTS:** the applicant must be a sophomore or junior attending an accredited college or university, the applicant must be able to demonstrate interest in entering the tag and label industry. Major course work should include those courses which are appropriate for the tag and label manufacturing industry. Such courses might include: Management, Sales, Marketing, Graphic Arts, Graphic Design, Production the applicant must exhibit proficiency in overall academics (a minimum of 3.00 GPA), the applicant shall possess excellent character including work ethic, honesty and integrity. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application must be received by: March 1, 1998.

SME EDUCATION FOUNDATION SCHOLARSHIPS

CURRENT UNDERGRADUATE STUDENTS

Applicants for the following scholarships must be full-time students enrolled in a manufacturing engineering, manufacturing engineering technology, or a closely related field of study at an accredited college or university.

Caterpillar Scholars Award Fund

supports five scholarships of \$2,000 each for students enrolled in a manufacturing engineering program. Minority applicants may apply as incoming freshmen. Applicants must have an overall minimum GPA of 3.0 on a 4.0 scale.

Lucille B. Kaufman Women's Scholarship

Fund - supports one scholarship of \$1,000 for a female student enrolled in a manufacturing engineering or technology program. Applicants must have an overall minimum GPA of 3.5 on a 4.0 scale.

Wayne Kay Co-Op Scholarship

provides two scholarships of \$2,500 each for students enrolled in a manufacturing engineering or manufacturing engineering technology co-op program. Applicants must have an overall minimum GPA of 3.5 on a 4.0 scale.

Wayne Kay Scholarship Fund

supports ten scholarships of \$2,500 each for students enrolled in a manufacturing engineering or manufacturing engineering technology program. Applicants must have an overall minimum GPA of 3.5 on a 4.0 scale.

St. Louis Chapter 17 Scholarship Fund

supports five scholarships of \$1,000 each for students enrolled in manufacturing engineering, industrial technology, or other manufacturing related programs. Applicants must attend one of the approved schools with an SME Student Chapter sponsored by St. Louis Chapter 17 and have an overall minimum GPA of 3.0 on a 4.0 scale.

Myrtle and Earl Walker Scholarship Fund

supports 20 scholarships of \$1,000 each for students enrolled in a manufacturing engineering or manufacturing engineering technology program. Applicants must have an overall minimum GPA of 3.5 on a 4.0 scale.

William E. Weisel Scholarship Fund

supports one scholarship of \$1,000 for a student enrolled in a manufacturing engineering or technology program who is seeking a career in the manufacturing, robotics, or automated systems fields. Applicants must have an overall minimum GPA of 3.5 on a 4.0 scale.

GRADUATE STUDENTS

Applicants for the following fellowship must be accepted into a graduate program for a Masters or Doctorate degree, have proven scholastic ability, exemplary character and leadership capability,

and have demonstrated the potential for future leadership in the profession.

Wayne Kay Graduate Fellowship

provides fellowships of \$4,000 to \$12,000 each for graduate students seeking a Masters or Doctorate degree and faculty seeking a Doctorate degree. Applicants must be accepted in a graduate program for manufacturing engineering or industrial engineering. Graduate students will not be funded beyond the first post-master year. Applicants must have an overall minimum GPA of 3.5 on a 4.0 scale. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application must be received by March 1, 1999.

SCHOLARSHIPS IN ENGINEERING 1998/99 JOINT ENGINEERING COUNCIL OF Greater Kansas City

American Institute of Chemical Engineers (AIChE)

The scholarship of approximately \$2,000/year is awarded to deserving Chemical Engineering majors from the Kansas City area. (Not given every year.) For more information contact: Dr. Marylee Southard, Chemical & Petroleum Eng. Dept., University of Kansas, 4006 Learned, Lawrence, KS 66045, phone: 785-864-3868 or marylee@ukans.edu.

American Society for Quality (ASQ)

The ASQ Kansas City Section 1301 will award three \$1000 scholarships in 1999. The purpose is to promote education in the quality sciences and encourage careers in the quality profession. **Qualification Criteria:** Be enrolled in an eligible college as a full-time or part-time student; minimum GPA of 2.75; be sponsored by a Kansas City Section member. **Application Deadline:** March 21, 1999. For more information contact: Joyce Neal, 13905 North 110th Terrace, Lenexa, KS 66215, phone: 816-997-4188.

Engineers Club of Kansas City (EC)

The Engineers club was founded as an organization dedicated to assisting those persons wishing to pursue a career in engineering. The EC's Student Assistance Fund (SAF) provides up to \$1,000 in financial assistance to Kansas City area students enrolling or enrolled in an accredited engineering curriculum. The SAF service area includes the following counties Cass, Clay, Jackson, Platte, and Ray in Missouri; and Johnson, Leavenworth and Wyandotte in Kansas. Financial assistance is offered primarily in the form of grants. **Qualification Criteria:** Financial need, accredited engineering curriculum, GPA, and progress towards degree. **Application Deadline:** June 1st For more information contact: John Frerking, Burns & McDonnell, 9400 Ward Parkway, Kansas City, MO 64114, Phone: 816-822-3347.

Mid-West Concrete Industry Board (MCIB)
The fund is an endowment fund that will provide financial assistance to college engineering students pursuing a Bachelor of Science or higher degree that includes concrete and concrete design courses as an integral part of their degree program. Applicant's permanent residence must be in Kansas or Missouri within a 150 mile radius of the Kansas/Missouri state line at highway 135. **Qualification Criteria:** Financial need, academic achievement, curriculum, growth, character, leadership capacity and career interest. **Application Deadline:** April 30th For more information contact: The Mid-West Concrete Industry Board, Inc., Jim Thompson, P.O. Box 6085, Shawnee Mission, KS 66206, phone: 913-681-2219.

National Society of Black Engineers (NSBE)

The objective of the Scholarship Program is to provide assistance to African American students pursuing an engineering degree. The National Society of Black Engineers' overall mission is to increase the number of culturally responsible Black Engineers encouraging them to excel academically, succeed professionally and to positively impact the community. **Qualification Criteria:** African American, GPA 2.75 or higher, attend a high school in Kansas City, MO or Kansas City, KS and plan to major in engineering, and ACT/SAT scores. **Application Deadline:** April 30th For more information contact: Cheryl Hooper, NSBE Scholarship Program, P.O. Box 30011, Kansas City, MO 64112, phone: 816-235-1291, e-mail: hooperc@umkc.edu.

Society of Women Engineers (SWE)

SWE offers two \$500 scholarships to new, current, and returning students who will be enrolling in an approved engineering college curriculum. **Qualification Criteria:** Female, ABET accredited

schools, engineering discipline, essay. **Application Deadline:** March 15th For more information contact: Marie Vanderpool, SWE Scholarship Chair, phone 816-983-3125, e-mail: marie.j.vanderpool@usace.army.mil

ROY M. MCBRIDE SCHOLARSHIP/LOAN, GRIMM SCHOLARSHIP, GENERAL MOTORS SCHOLARSHIP

Qualifications are that recipients shall be juniors or seniors who are progressing satisfactorily toward a baccalaureate degree in engineering and shall be persons of good character, high integrity, and common sense of applied engineering. A cumulative GPA of 3.00 is a reasonable cut-off for selection of scholarship recipients. Recipients must also have financial need. Students who received an award this year will need to reapply to be considered for a 1999/2000 award. The same application process and form will be used to select recipients of the C.J. Grimm scholarship as the requirements are quite similar. The Grimm Scholarship requires that students be in the upper one fourth of their class and financial need is not to be considered. Funds also available from General Motors, same application form will be used for that scholarship. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Applications must be submitted by: February 1, 1999.

ROLLA LIONS CLUB VANCE SCHOLARSHIP FUND

OFFERS \$1,000
REQUIREMENTS: Financial need highly regarded. Must be Newburg, St. James, or Rolla High School Graduate Min. g.p.a. 3.0 Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Applications deadline must be returned no later than: April 1, 1999.

CRANE FUND FOR WIDOWS AND CHILDREN SCHOLARSHIP

REQUIREMENTS: for needy and deserving widows and children of men who, at their death, have left their widows and children without adequate means of support or deserving wives and/or children of men upon whom they are dependent for support but, because of age or other disability, are unable or for other reasons, fail or neglect to adequately support their respective wives and/or children. If you meet the above terms for this program you must complete a Crane Fund for Widows and Children Application to be considered for funding. Applications available in the Student

AMERICORPS NATIONAL SERVICE

Students wishing to receive information on this program may call 1-800-942-2677 or visit www.americorps.org

1999-2000 AMERICAN METEOROLOGICAL SOCIETY INDUSTRY UNDERGRADUATE SCHOLARSHIPS

A total of 12 scholarships will be awarded. Prospective candidates from the fields of atmospheric sciences, oceanography, hydrology, chemistry, computer sciences, mathematics, engineering, and physics who intend to pursue a career in the atmospheric and related oceanic and hydrologic sciences are encouraged to apply. The awards are based on merit and awarded to students who demonstrate potential for accomplishments in these fields. The scholarships are available to students who will be juniors in the fall of 1999. The award is renewed for the senior year based on the recipients performance and the recommendation of a faculty advisor. Students who are enrolled in a program leading to a bachelor's degree in science or engineering who have demonstrated a clear intent to pursue a career in the atmospheric or related oceanic or hydrologic sciences following completion of appropriate specialized education at the graduate level. Clear intent must be demonstrated by presentation of a proposed program of study for the junior or senior years designed to prepare the student for admission to a graduate program in the atmospheric or related discipline, and enforcement of the student's plans by submission of a written statement from one or more faculty members familiar with him or her objectives. Applicants must have successfully completed two years of study by August 1999 at an accredited institution with a minimum grade point average of 3.0 on a 4.0 status. There is no age restrictions. HOW TO APPLY: To request an application package, mail a self-addressed, stamped envelope to: American Meteorological Society, Attn: AMS/Industry Undergraduate Scholarship Program, 45 Beacon Street, Boston, MA 02108-3693 Application deadline due February 26, 1999

1999-2000 AMERICAN METEOROLOGICAL SOCIETY INDUSTRY GOVERNMENT GRADUATE FELLOWSHIPS

entering their first year of graduate school in the fall of 1999. An applicant must provide evidence of acceptance as a full-time student at an accredited U.S. institution at the time of award. Students must pursue a related full-time course of study in the atmospheric or related oceanic or hydrologic sciences over a full academic year. Candidates must be U.S. citizens or hold permanent resident status. The Society encourages applications from women, minorities, and disabled students, traditionally underrepresented in the atmospheric and related oceanic and hydrologic sciences. HOW TO APPLY: To request an application package, mail a self-addressed, stamped envelope to: American Meteorological Society, Attn: Fellowship Program, 45 Beacon Street, Boston, MA 02108-3693 Application due date February 26, 1999

NATIONAL FEDERATION OF THE BLIND OF MISSOURI 1999 SCHOLARSHIP

The National Federation of the blind of Missouri announces its annual scholarship. Students who are blind or visually impaired are eligible for this award. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application deadline is: February 19, 1999.

NAWIC NATIONAL ASSOCIATION OF WOMEN IN CONSTRUCTION ST. LOUIS CHAPTER 38

Students must be enrolled in a curriculum leading to a career in a construction-related field. Applicants are selected based on financial need, grad point average and commitment to their field of study. NAWIC MEMBERS AND THEIR FAMILIES ARE NOT ELIGIBLE. Equal consideration will be given to all applicants, male and female. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Submit deadline is: March 31, 1999

NATIONAL ASSOCIATION OF WOMEN IN CONSTRUCTION THE GREATER KANSAS CITY, MO NAWIC SCHOLARSHIP FOUNDATION

The National Association of Women in construction is an international association of approximately 6,000 women employed in various phases of the construction industry. The Greater Kansas City, Missouri NAWIC Scholarship Foundation offers scholarships to students pursuing a career in the construction industry. Applications available

Hall. Applications must be postmarked on or before: March 31, 1999

AIR & WASTE MANAGEMENT ASSOCIATION MIDWEST SECTION

Individuals must be full or part-time graduate students pursuing a course of study and research at the start of the 1999/2000 academic year leading to careers in air pollution control and/or waste management. The Scholarship is only a one-year award. To qualify for a second year, individuals must reapply. Undergraduate students are eligible to apply if they have been accepted into a program of graduate study. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application materials must be postmarked by: May 31, 1999

THE GREATER KANSAS CITY HISPANIC SCHOLARSHIP FUND 1999

The Hispanic Scholarship Fund was established in 1985 to invest in the young Hispanic people of the Greater Kansas City Area by providing grants to both entering and continuing college students. The primary focus was to assist those Hispanic living in the area with the largest concentration of Hispanic residents, generally said to be the Argentine and Armourdale communities in Kansas and the Westside neighborhood in Missouri. The applicant must exhibit proven academic merit (as reflected in GPA and answer to essay questions), financial need (as exhibited by family's gross income, size of family, and other financial need), and community involvement (as reflected in the application). The applicant is a permanent resident of the Greater Kansas City Metropolitan Area and is a United States citizen or lawful United States Resident. The applicant has been accepted or is enrolled in a fully accredited college or university and is working toward an associate, bachelor, or graduate degree. (Applicants attending vocational or trade schools are not eligible.) The applicant must be enrolled as a full-time student (minimum 12 credit hours). Applicant must be Hispanic. The objective of this program is to provide financial assistance to Hispanic Americans. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application deadline: March 5, 1999

THE SCHOLARSHIP FOUNDATION OF ST. LOUIS AMEREN SCHOLARSHIP PROGRAM

Through a gift from the Ameren

Foundation is providing grants of \$2,500 per year to 100 students. The Scholarship Foundation is solely responsible for the selection of grant recipients. Dependents of employees and employees of Ameren and its subsidiaries are not eligible. ELIGIBILITY: Be a customer or dependent of a customer of the Ameren Corporation (AmerenUE or AmerenCIPS). Be a full-time student who will be enrolled for at least an academic year and who will seek an undergraduate degree at an accredited college or university in Missouri or Illinois. (Ministry and seminary students are not eligible.) Be a citizen of the United States or in possession of an Alien Registration Card. Demonstrate financial need. Have achieved a minimum cumulative 2.0 grade point average on a 4.0 scale in high school or college course work. Applications available in the Student Financial Assistance Office, G-1 Parker Hall. Application deadline submitted: April 15, 1999.

INTEREST-FREE LOAN PROGRAM

The Interest-Free Loan Program is available to post-secondary students working toward vocational, undergraduate and advanced degrees at accredited educational institutions. A student may borrow up to \$3,200 per academic year at the graduate or professional school level. The average interest-free loan is \$2,200 per year for an undergraduate student. The loan may be renewed annually. At the completion of the degree or certificate program, a twelve month grace period is granted. Repayment is scheduled over a five year period (60 monthly payments). ELIGIBILITY: Be a citizen of the United States or in possession of an Alien Registration Card. Be a permanent resident of St. Louis City, St. Louis County, Franklin County, Jefferson County, or St. Charles County for at least two years prior to the date of application. Demonstrate financial need. Be a responsible borrower, without history of educational loan default or bankruptcy. Have achieved a minimum cumulative 2.0 grade point average on a 4.0 scale in high school or college course work. Applications are available twice per year (January 1 to April 15 and August 1 to November 15). The deadline is April 15 to be considered for an annual loan award. Funding is limited and restricted to one semester for application materials received by the November 15.

SPECIAL LOAN PROGRAMS

These programs below do not have application deadline. Contact the Program Director at (314) 725-7990 for an application.

DEEDEE BECKER NURSING LOAN

is an interest-free loan. Students must have high financial need and plan to pursue a degree in licensed practical nursing, registered nursing, or a bachelor of science in nursing. All of the eligibility criteria for the Interest-Free Loan Program must be met to apply for the loan.

EMERGENCY LOAN

The Emergency Loan is an interest-free loan designed to assist students who are facing a crisis situation that may interrupt their pursuit of higher education, such as a death of a parent or spouse, a major change in financial aid awarded, unforeseen medical expense, or an unplanned occurrence. All of the eligibility criteria for the Interest-Free Loan Program must be met to apply for the loan. Applications available in the Student Financial Assistance Office, G-1 Parker Hall.

1999-2000 TWA SCHOLARSHIP

REQUIREMENTS Students must currently be residents of the State of Missouri as defined by the rules of the Board of Curators. Graduate and undergraduate applicants must be currently enrolled or accepted for admission to an academic program at the University of Missouri in environmental engineering or environmental science. Graduate students are eligible at any level; undergraduate students must have completed 60 hours of college course work, not necessarily at the University of Missouri. Law students who intend to pursue a career in the area of natural resources or environmental law are eligible. Prior TWA Scholarship recipients are eligible to reapply. Applicants will be evaluated on the basis of grade point average, GRE scores (where available), research, and other relevant experience. Applicants available in the Student Financial Assistance Office, G-1 Parker Hall. Application deadline: March 15, 1999.
